SUMMARY

Data & Analytics professional with **5+ years of experience in Business Intelligence, Tableau development, and analytics engineering** with additional business leadership experience. Expert in **Tableau, Power BI, SQL, Snowflake, and dbt**, building scalable data models and high-performance dashboards and data migration

Proven ability to design **enterprise BI solutions, KPI frameworks, and self-service analytics platforms** that enable data-driven decision making. Experienced in **Power BI DAX development, Power Query transformations, and advanced Tableau dashboard optimization** for large-scale analytics environments.

EXPERIENCE

VISIONQUEST SOLUTIONS

Bengaluru

Tableau Development

- Client : Fractal Analytics
- 11/2020 - Present
- Designed and developed **interactive Tableau dashboards** using **parameters, filters, actions, and drill-down capabilities** to enable dynamic data exploration.
 - Implemented **Level of Detail (LOD) expressions (FIXED, INCLUDE, EXCLUDE)** to create advanced business metrics independent of visualization granularity.
 - Built **high-performance Tableau dashboards** by optimizing **extracts, aggregations, and SQL queries**, reducing dashboard load time and improving user experience.
 - Integrated data from **multiple sources including SQL databases, Snowflake, and flat files** using **joins, unions, relationships, and data blending**.
 - Enhanced **reusable Tableau data sources and dashboard templates** to standardize reporting and reduce dashboard development time.
 - Published and maintained dashboards on **Tableau Server / Tableau Cloud**, managing **user permissions, subscriptions, and scheduled data refreshes**.

Power BI Development

- Developed **complex DAX measures** including time intelligence functions (YTD, QTD, rolling averages) to enable dynamic KPI reporting.
- Built **Power Query transformation pipelines** integrating multiple data sources including SQL databases and Snowflake.
- Implemented **star schema data models** in Power BI to improve query performance and report scalability.
- Configured **Row-Level Security (RLS)** for secure access across different business teams.
- Implemented **incremental refresh strategies**, improving report refresh efficiency by **60%**.
- Improved executive dashboards tracking **revenue trends, operational KPIs, and performance metrics**.
- Implemented **data quality validation tests** ensuring accuracy and reliability of enterprise analytics data.
- Optimized **Power BI report performance using efficient DAX calculations, query reduction techniques, and data model optimization**, improving dashboard responsiveness and user experience.
- Collaborated with business stakeholders to **translate business requirements into scalable Power BI dashboards and visual analytics solutions**.

SKILLS

SQL(Advanced)		Tableau Desktop	
Tableau Server		Tableau Cloud	
Tableau Online		Power Bi	
DAX (Advanced Measures)		Power Query	
Dbt	Snowflake	Data modelling	
Data visualization		LOD Expressions	Jira
Git/version control			

PROJECTS

1. Healthcare Operations & Utilization Dashboard

Built a **Tableau and Power BI dashboard** using **SQL, dbt, and Snowflake** to monitor **patient volume, length of stay (LOS), bed utilization, and throughput metrics**. Improved **dashboard performance by 40%**, increased **self-service adoption by 55%**, and enabled data-driven operational planning for hospital leadership.
2. Claims & Revenue Cycle Analytics Dashboard

Created an **enterprise healthcare claims and revenue dashboard** on **Snowflake with dbt transformations** to track **claims volume, denial rates, reimbursement, and aging metrics**. Reduced manual reporting by **45%** and improved **financial reporting accuracy by 35%**.
3. Population Health & Care Management Dashboard

Created a **population health analytics dashboard** using **Power BI, SQL, dbt, and Snowflake** to segment patients by **risk, chronic conditions, and utilization patterns**. Enabled proactive care interventions, improving **analytics adoption by 60%** among clinical and care management teams.
4. Provider Performance & Quality Metrics Dashboard

Designed and Streamlined a **Tableau-based provider performance dashboard** using **SQL, dbt, and Snowflake** to analyze **quality measures, patient outcomes, readmission rates, and regulatory compliance KPIs**. Implemented **automated data validation and quality checks**, improving **data reliability by 30%**. Enabled **provider-level performance benchmarking** and trend analysis, supporting clinical leadership in identifying improvement opportunities and driving quality-focused decision-making.

EXPERIENCE

Business Development Manager

Milkbasket

📅 03/2017 - 05/2020

- Led and managed a **cross-functional team of 10 sales executives and 14 interns**, using **performance metrics and daily reporting** to track targets, productivity, and territory performance across Bangalore.
- Built the **sales organization from the ground up**, defining **KPIs, acquisition metrics, go-to-market strategies**, and execution plans aligned with business growth objectives.
- Drove **data-informed customer acquisition initiatives**, onboarding **6,000+ customers within 6 months** through vendor buyouts and targeted market expansion strategies.
- Partnered closely with **operations and logistics teams** to monitor **delivery performance metrics**, proactively resolve issues, and improve service reliability.
- Led Tenco acquisition in North Bangalore, onboarding 118 vendors serving 19,500 customers. Ensured data continuity and operational scalability. Expanded market by launching new sales territories, optimizing resources through performance insights.
- Led a cross-functional team of 24 members, improving territory performance tracking via daily reporting metrics across Bangalore.

STRENGTHS

- ⚡ Tableau Dashboard Development
- 💎 Power BI Performance Optimization
- 👁️ Data Story telling & Business Insight Generation
- 🔗 Business-to-Technical Translation
- 🤝 Stakeholder Collaboration
- 🗄️ Advanced SQL & Analytics Engineering

KEY ACHIEVEMENTS

- 📊 **Data Modeling & Query Performance Optimization**
Engineered and optimized **SQL dimensional data models**, improving **query performance by 40%** and supporting faster, more reliable BI reporting.
- 🔗 **BI Dashboard Performance & Adoption**
Delivered **high-performance Tableau and Power BI dashboards** with optimized extracts and calculations, resulting in a **60% increase in dashboard usage** among business stakeholders.
- 🔧 **Legacy Report Migration**
Successfully migrated over **100+ reports** from Excel to Power BI and Tableau, enhancing **visual storytelling** and reducing maintenance overhead.
- 👥 **Cross-Functional Dashboards**
Created and deployed **50+ interactive dashboards** used by business units across **sales, healthcare, and operations**, leading to **faster data-driven decisions**.
- 🔗 **Collaboration with Data Teams**
Partnered with data engineers to optimize data models and pipelines, reducing dashboard load times by **25%**.

EDUCATION

Master Of Computer Applications

KARNATAKA SOUTH UNIVERSITY

📅 06/2014 - 04/2016 📍 Bengaluru, India

CERTIFICATION

Microsoft Power BI Data Analyst (PL-300) – Microsoft Certified

SQL with Python Certification – Advanced Data Analysis & Automation
